

January 26, 2026

To Our Valued Customers,

This notice is to confirm a revision to the effective date of our previously announced price adjustment.

Due to recent changes to Canadian government policy regarding the importation of steel, LUX continues to experience higher input costs resulting from increased tariffs on steel-related materials. While an 8% price increase on all products was originally scheduled to take effect February 2, 2026, the effective date has been revised to **April 1, 2026**.

This remains LUX's first price adjustment since May 2022.

We appreciate your understanding and look forward to our continued partnership.
