---

April 6, 2026

To our Valued Customers,

Most of you are well aware of the Middle East situation and the turmoil it's causing both in regard to oil pricing and petro chemical shortages.

In light of the above some of our suppliers have already begun renegeing on previously agreed upon purchase orders. We therefore, have no choice but to implement the following;

- 1. As of April 15<sup>th</sup>, 2026 all prices will be increased by a further 0.20/ LB US or 0.28/LB CDN.**
- 2. Furthermore, in light of the uncertainty in regards to resin availability, we will not be able to accept any orders over and above your usual purchase quantities.**
- 3. We also would like to keep you advised that, in all likelihood there will be a further increase by resin suppliers as of May 1, 2026 for a minimum of 0.10/LB US or 0.14/LB CDN.**

In closing, it is likely that this pricing and supply turmoil will continue at until at least the end of the summer, perhaps even the end of the year, this depending on how significant the damage to Middle Eastern Petro Chemical facilities are and the availability of oil and LNG as we move forward.

Many thanks for your understanding

Management.
