From: Menzies Group

Subject: Price Adjustment Notice: Galvanized Metal Products and Flashings and Copper Products

Dear Valued Partner,

We are writing to inform you of an upcoming price adjustment from Menzies Group affecting galvanized metal products, galvanized flashings and rolls and copper products manufactured by Menzies Metal.

Global metal markets continue to face significant cost pressure. Steel, copper, coated metals, and related inputs are being impacted by supply constraints, higher processing costs, trade and tariff pressure, freight volatility, and strong global industrial demand. These conditions are affecting the cost and availability of copper products and other metal-based materials used throughout our manufacturing process.

Although we pride ourselves on maintaining price stability wherever possible, current market conditions require us to take action to ensure continued product availability, service reliability, and long-term supply continuity. While we have absorbed as much of these increases as possible, the scale and persistence of current raw material inflation can no longer be offset internally.

Effective August 23, 2026, pricing will increase by product category as follows:

- Galvanized Flashing Sticks and Rolls (Painted or Unfinished) – 20%
- Copper Drains – 15%
- Galvanized (Painted or Unfinished) - 12%

***Updated price lists will be provided over the coming weeks to authorized individuals in your organization.**

There is also concern across the industry that raw material conditions may remain volatile. Should market costs continue to escalate, additional pricing adjustments may be required in the future.

Order & Pricing Timing:

- Current pricing will be honoured on all orders received prior to August 23, 2026, and shipped on or before August 30, 2026, or at Menzies Group's discretion.
- To help manage the impact of this change, we encourage you to review upcoming requirements and place orders in advance of the effective date where possible.
- Our team is available to support you with product availability, order planning, and any questions related to timing.

We appreciate your understanding and continued partnership. Our priority remains ensuring consistent supply, product quality, and service continuity for our partners.

Please reach out to your Menzies Group representative for support or to discuss your upcoming needs.

Sincerely,

Menzies Group
