

May 01, 2025

To Our Valued Customers,

As you are aware, tariffs have been imposed on globally imported finished goods and raw materials brought into the United States from international markets. These tariffs impact on our adhesive, sealant and foam portfolios sold under our LePage & GE brands that are then sold into Canada.

As a result, **we are implementing tariff related cost adjustment surcharges** that will be applied as a **line-item charge** on all impacted products for orders **received and/or shipped on or after June 1, 2025**.

For EDI customers, we ask for your support in updating your mapping to ensure orders are processed smoothly and without delays. Please note that we cannot accept pull-ahead orders outside of normal ordering patterns. We will continue to monitor the situation closely and adjust our approach as needed.

We appreciate your understanding and continued support. Henkel remains fully committed to partnering with and serving our customers with transparency and consistency.

Sincerely,

A handwritten signature in black ink, appearing to read "Matt Canning", followed by a long horizontal line that ends in a stylized arrow pointing to the right.

Matt Canning
Vice President
